Midwest Scalp
MICROPIGMENTATION

WHAT IS SCALP MICROPIGMENTATION?

All You Need to Know About The America's Fastest Growing Solutions to Hair Loss...

The hair tattoo which creates the illusion of hair follicles...

These ink dots are known as "impressions", which perfectly replicate the appearance of hair follicles and can be used to:

1. Create a brand new hairline
2. Add density to thinning hair
3. Conceal bald patches or scarring on the head

3 sessions needed for a complete result...

Each sessions serves a clear, distinct purpose in achieving the desired final look.

Session 1: laying the foundations & structuring the hairline

Session 2: packing the density (this is where things really start to take shape).

Session 3: final adjustments to ensure the perfect, natural result.

After the 3rd session, touch-ups are recommended every 2-3 years to keep the colour looking sharp.

The Final Result Is Flawless...

Just take a look at what can be achieved with scalp micropigmentation.

Our technicians are the best in the world when it comes to delivering natural scalp micropigmentation, and we show our students exactly how it's done!

What our clients say

OwnU´Style LLC

The Certificate Training class with Midwest Scalp Micropigmentation SMP was an awesome experience with promising value in the beauty industry. Unlike some 3day training courses, Midwest SMP is worth every dime! It was truly all that the program was promised to be, & providing top supplies. The instructors were great , very professional and made the learning experience fun and the rest was smooth sailing from there! Our questions were answered with plenty detail & information till we felt comfortable enough to move to next phase. Classmates were enjoyable & easy to get a long with. I'm excited to see what our future holds in our new found career paths! Its only up from here!
